Paper Title

Heart Disease Prediction using Machine Learning

Abstract

Heart disease is one of the leading causes of death worldwide and has become a major public health concern. The increasing number of patients suffering from heart-related problems is mainly due to unhealthy lifestyle habits, lack of physical activity, poor diet, and stress. Traditional methods of diagnosing heart disease require several medical tests and expert analysis, which can be time-consuming and expensive. Moreover, human-based diagnosis may sometimes lead to errors due to complexity of medical data. With the growth of digital healthcare systems, large amounts of patient data are now available, which can be efficiently analysed using machine learning techniques.

Submission Questions Response**1. Corresponding author Email ID***Provide Email ID of corresponding author*

ansh1288.be22@chitkara.edu.in

2. Contact number with country code*Provide Whatsapp number of corresponding author with country code*

+91 6230771658

3. Author's Information

I confirm that I have listed the title of the paper and the names, email addresses and affiliations of all contributed authors in the submission system that match the order as given in the submitted paper

Agreement accepted

4. Co-author's Consent

I confirm that I have discussed about this submission with all co-authors and authors have approved the paper and agree with its submission to this conference.

Agreement accepted

5. Certificate of Originality

I confirm that neither the paper nor any parts of its content are currently under consideration or published in another conference/journal and the paper is free from plagiarism

Agreement accepted

6. Author's Consent

It is confirmed that at least one author will register in full to attend and present the paper at the Conference.

Agreement accepted

7. The use of artificial intelligence (AI)-generated text (e.g., by ChatGPT)

I confirm that no text in the paper is AI-generated.

Agreement accepted
